

device according to claim 17 for mutually converting a coded bit stream between the transmission side moving image coding device and the receiving side moving image decoding device.

33. A moving image communication system comprising:
a transmission side moving image coding device and a
receiving side moving image decoding device having different moving image compression
systems; and a moving image compression-coding system conversion
device according to claim 18 for mutually converting a coded bit stream between the transmission
side moving image coding device and the receiving side moving image decoding device.

REMARKS

In view of the above amendment, applicant believes the pending application is in
condition for allowance. Accordingly, the Examiner is respectfully requested to pass this
application to issue.

Dated: October 7, 2005

Respectfully submitted,

By Edward A. Meilman
